

Fran Drescher's Master Class Health Summit

October 2025

CancerSchmancer.org

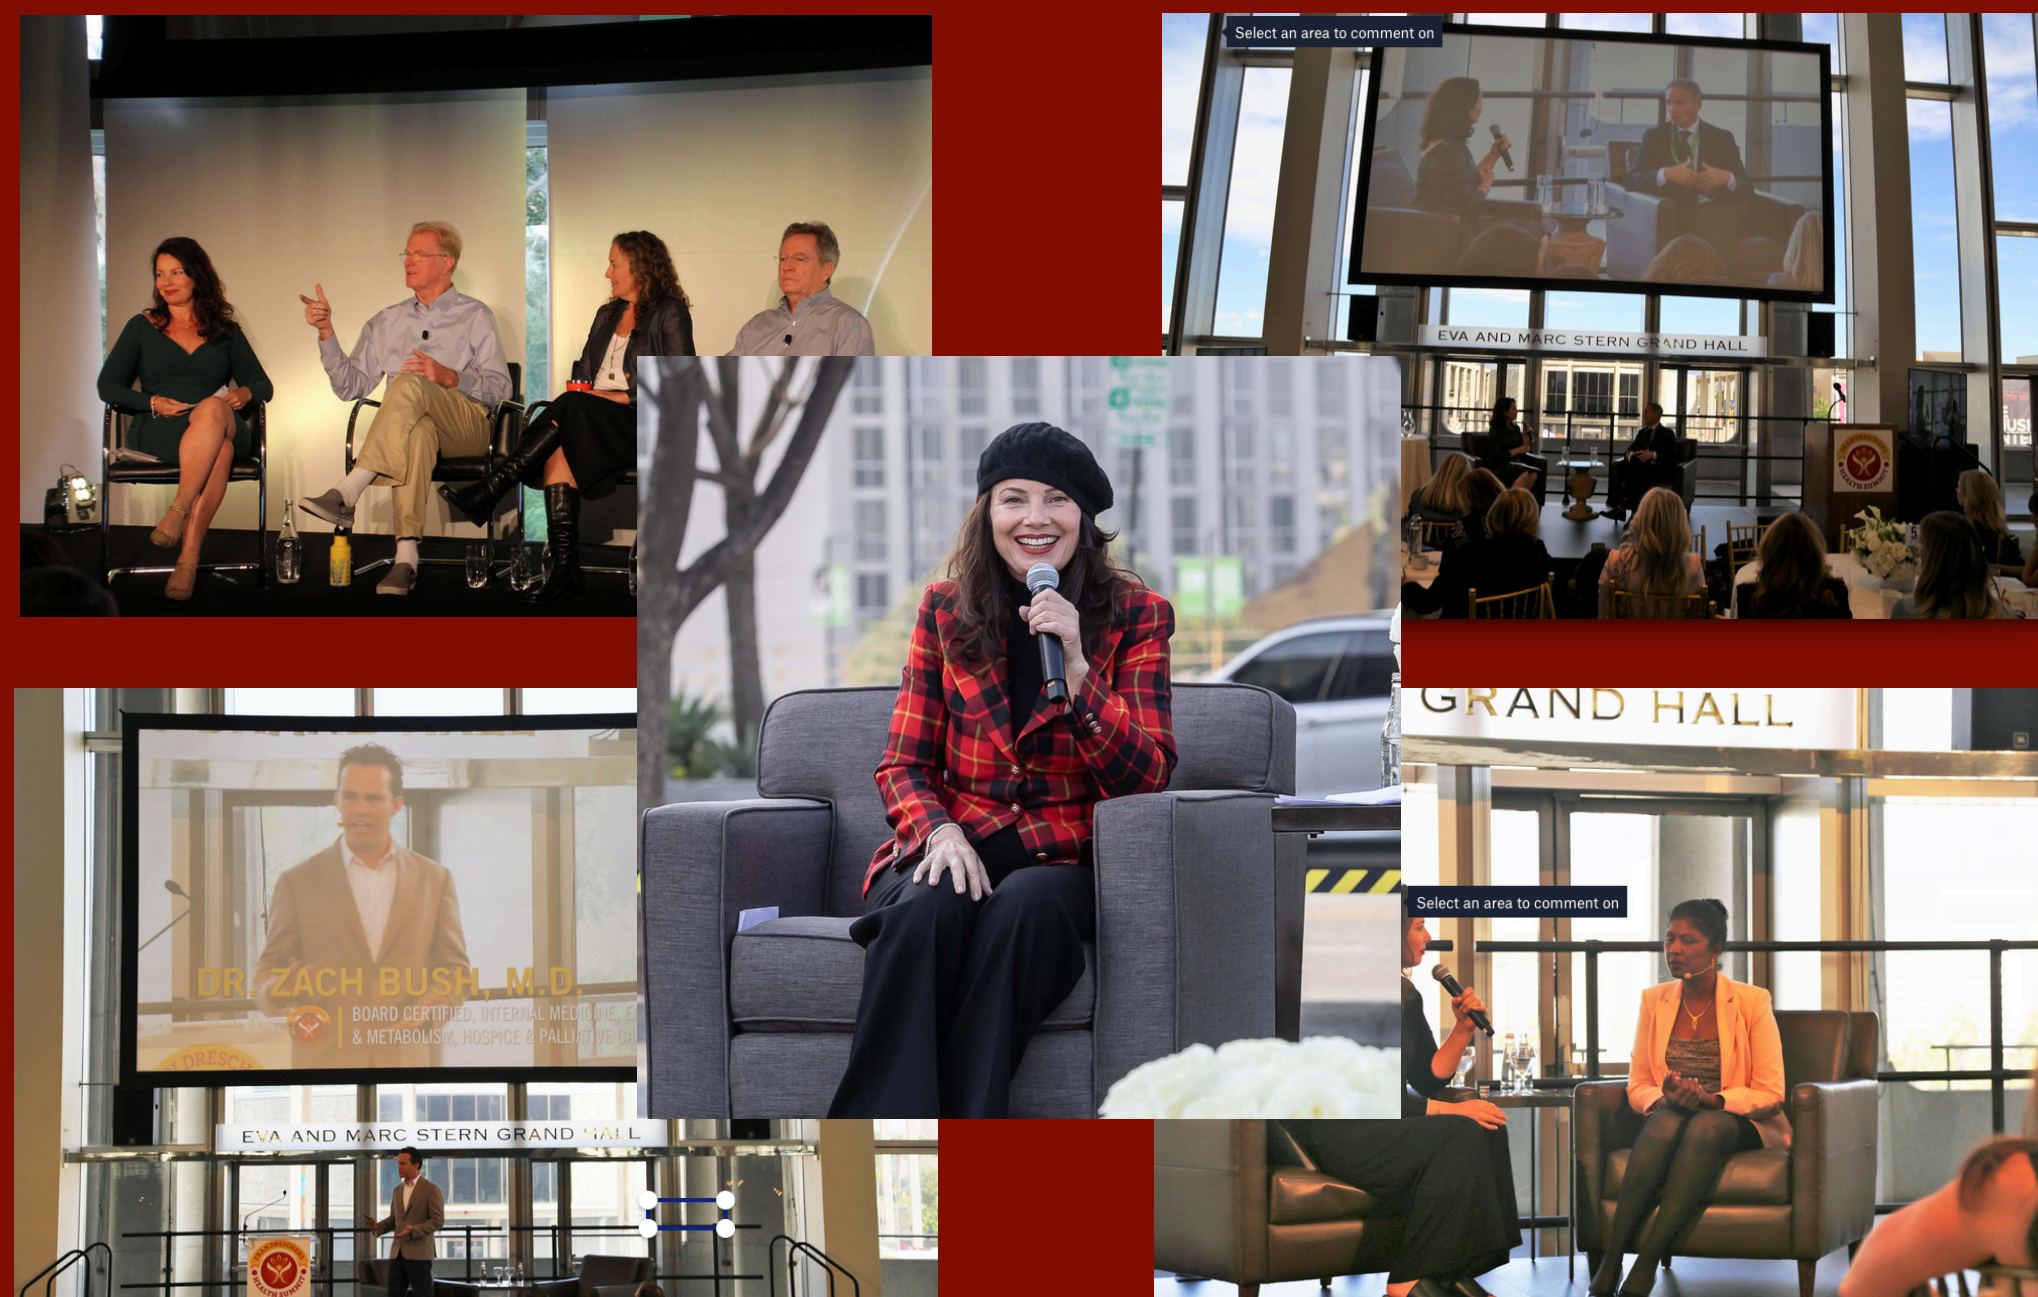

Fran Drescher's Master Class Health Summit is an intense one-day seminar designed to educate, motivate, and activate you to take control of your body.

It's a life-changing event featuring cutting-edge, mind-blowing thought leaders breaking new ground in medicine. A new concept of why we experience disease, one that focuses on wellness rather than sickness.

We try to understand the causes of disease and how to eliminate them. This October, Fran and her guests explore Empowering the Aging Woman. Subjects range from hormone balancing and functional health to mental agility. Plus an in-depth conversation with the legendary Jane Fonda.

Attendance

The summit attracts 300+ women and men who want to learn about living a healthy, green, and preventative lifestyle.

Many attendees are already committed to their health and are looking to broaden their knowledge with innovations on treatment and staying healthy.

Others are medical professionals who attend to incorporate what they learn into their practices.

Some attendees are surviving with cancer or other serious and chronic illness who want to be proactive about their cure.

The summit also streams to a worldwide audience in the hundreds of thousands, and the replay lives permanently on CancerSchmancer.org.
